Art Unit: 3624

DETAILED ACTION

1. Claims 1-36 have been examined.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-36 are rejected under 35 USC 103(a) as unpatentable over Giovannoli(US Pat. No: 5,842,178) in view of Mandler(US Pat. No: 5,732,400).

4. As per claims 1-36 Giovannoli teaches a plurality of agents connected to a network(Abstract)(Fig 1) including a server, a buyer and a seller(Fig 1) and a method for calculating a quotation(Fig 2A) including product specification(Fig 2A) and transmitting the product specification data set to a seller(Fig 2A) and receiving responses from the vendors to provide to the buyer(Fig 2B) as well as responding to a request for quote by e-mail(Fig 3) and generation of the required RFQ(Fig 6)(Fig 5) using the Internet(Fig 4) including product specification, tracking numbers, quantities, vendor qualifications,dates, prices, taxes, delivery time and charges(Fig 7). Mandler teaches transmission of purchase orders and a clearinghouse response(Fig 4A-1/S12) to a buyer's risk rating(col 13 line 34-col 16 line 56) including

acceptance or rejection(Fig 4A-1/S15.2) as well as renegotiation of a price due to risk based discounting(col 5 lines 6-17).It would have been obvious to one of ordinary skill in the art at the time of the invention to combine Giovannoli in view of Mandler to teach the above. The motivation to combine is to teach a transactional system between sellers and buyers that are unrelated which includes a clearinghouse that makes a dynamic real time risk assessment of buyers that determines a credit line for each buyer and a risk-based discount rate for each buyer based on the buyer's risk classification as enunciated by Mandler(col 3 lines 31-47).

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 32-36 are also rejected under 35 USC 101 for failing to provide a concrete,useful and tangible result.

7. Any questions concerning this communication should be addressed to the examiner of record, Dr. Geoffrey Akers, P.E., who can be reached between 6:30 AM and 5:00 PM Monday through Friday at 703-306-5844. If attempts to contact the examiner are unsuccessful, the examiner's superior, Mr. Vincent Millin, SPE, may be telephoned at (703)-308-1065.
